

AI Mock Interview Report

Generated At: 2026-06-19T18:45:36.151712 UTC

Interview ID: c8217f13-b21f-4b0e-a652-3e062c2347fa

```
{
  "overall_score": 7.6,
  "hr_score": 7.2,
  "technical_score": 7.0,
  "coding_score": 8.5,
  "strengths": [
    "Strong foundational knowledge in Java and Spring Boot.",
    "Excellent problem-solving skills demonstrated through efficient and idiomatic Java Streams",
    "Clear and concise communication across all interview rounds.",
    "Ability to accurately implement complex requirements and adhere to good coding practices (",
    "Good high-level understanding of core concepts like RESTful APIs and JWT authentication fl",
    "Connects project experience to career aspirations effectively."
  ],
  "weaknesses": [
    "Needs to provide more specific and detailed examples when describing technical challenges",
    "Lacks in-depth technical detail and specific design decisions when explaining backend secu",
    "Could improve on elaborating specific instances of team collaboration.",
    "Minor gaps in coding robustness (e.g., explicit null checks, full class implementation for"
  ],
  "summary": "Anchal demonstrates a strong aptitude for software development, particularly in J",
  "recommendation": "Hire",
  "completed_rounds": [
    "hr",
    "technical",

"question_id": 1,
"question_number": 1,
"question": "Anchal, thank you for coming in. To start, could you briefly introduce yours",
"answer": "I'm Anchal, a B.Tech Computer Science student graduating in 2026. My interest",
"type": "hr",
"category": "Comprehensive (Introduction, Behavioral, Situational, Career Goals)",
"feedback": {
  "overall_score": 7.2,
  "communication": 7,
  "technical_accuracy": 8,
  "problem_solving": 6,
  "confidence": 8,
  "completeness": 7,
  "strengths": [
    "Clear and concise introduction",
    "Directly addresses all parts of the question",
    "Identifies relevant technical skills and project experience",
    "Connects experience to career aspirations",
    "Technically accurate in terms of concepts mentioned"
  ],
  "weaknesses": [
    "Lack of specific detail for the technical challenge",
    "Insufficient depth in describing the problem-solving process (did not 'walk through'",
    "Limited elaboration on team collaboration",
    "Generic explanation of interest in software development"
  ],
  "feedback": "Anchal provides a clear and concise introduction, directly addressing all",
  "improvement_suggestions": [
    "Provide a concrete and specific example of the 'API data handling and database integ",
    "Elaborate on the problem-solving process by describing the analytical steps taken, t",
    "Give a specific instance of 'collaboration and feedback' \u2013 how did you collabor",
    "Add a more personal or specific anecdote about what 'sparked your interest in softwa"
