SUMMARY

Aspiring Data Scientist with strong skills in ML, data preprocessing, and analytics. Experienced in turning complex datasets into meaningful insights to support smarter decisions.

EDUCATION

Roorkee College Of Engineering, Roorkee, Uttarakhand | 2022 - Present

• Bachelor of Technology in Computer Science and Engineering | CGPA - 7.5/10

Relevant Coursework: DSA, Operating Systems, OOPS, DBMS, Computer Networks

SKILLS

- | | |
|-----------------------------|---|
| • Programming | Python, SQL |
| • Data Visualization | Matplotlib, Seaborn, Power BI |
| • Mathematics | Statistics, Probability |
| • Machine Learning | Regression, Classification, Clustering |
| • Deep Learning | ANN, CNN, RNN, LSTM, NLP Techniques |
| • Platforms | PyCharm, Jupyter Notebook, MySQL |
| • Soft Skills | Analytical thinking, Problem-solving, Communication |

PROJECTS

Quora Duplicate Question Pair Detection using NLP & Ensemble Learning

[Link](#)

Tech Stack Used: Python, RandomForestClassifier, XGBoost, NLTK, BOW

- Developed an NLP-based duplicate question detector using RandomForestClassifier with 80% accuracy.
- Built text preprocessing pipeline with tokenization, BOW, and feature engineering.
- Compared Random Forest and XGBoost models to select the best-performing algorithm.
- Executed end-to-end workflow including data cleaning, model training, and performance evaluation.

Gurgaon Real Estate Intelligence System

[Link](#)

Tech Stack Used: Python, Scikit-learn, XGBoost, Streamlit, Data Science

- Led the development of a regression-based ML model to predict house prices using key housing data.
- Implemented data pipelines and performed in-depth EDA to uncover price-driving factors.
- Designed and built a user-focused recommendation system for optimal pricing and location insights.
- Developed and deployed a Streamlit app for real-time predictions and visuals.

AI-Powered Cattle Breed Classification System

[Link](#)

Tech Stack Used: Python, TensorFlow / Keras, VGG16 (Transfer Learning)

- Built a VGG16 transfer-learning model for cattle breed classification achieving 91% accuracy.
- Fine-tuned the last 30 layers to boost performance.
- Developed an image preprocessing pipeline with resizing, normalization, and augmentation.
- Completed end-to-end workflow including data preparation, training, evaluation, and deployment.

Internship

NullClass EdTech Private Limited | Data Science Intern

Nov 2024 - Jan 2025

- Worked on data science projects involving data cleaning, feature engineering, and data visualization.
- Built and evaluated machine learning models for classification and regression tasks.
- Gained hands-on experience with Python libraries such as Pandas, numpy, Scikit-learn, and Matplotlib.
- Collaborated with mentors and peers on real-world case studies and industry-relevant problems.

Certifications & ACHIEVEMENTS

Python for Data Science | NPTEL | IIT MADRAS

[Certificate](#)

- Earned an NPTEL “Python for Data Science” certification with 79% (Elite + Silver).

Python for Data Science | IBM

[Certificate](#)

- Achieved IBM’s “Python for Data Science”, gaining hands-on skills in data analysis and visualization.

Secured 2nd place in college-level internal hackathon.

[Certificate](#)

Participated in national-level hackathons, showcasing innovative problem-solving skills.

[Certificate](#)
